

The Jumper Rig

Self-Contained, Short-Term Mobile Pressurized Water Supply and Domestic Wastewater Collection Solution for Temporary Housing Installations.

Pressurized Water

- 2,000 Gallon Potable Water Storage Tank
- Auto Fill Connection
- Pressurized Pump with Pressure Tank and Auto Operation
- Distribution Piping and Connections for Site Included

Domestic Wastewater Collection

- 1,000 Gallon Domestic Wastewater Collection Tank
- Lift Stations and Piping for Waste Transfer Included
- Collection Tank Transfer Pump Built In

WaterFleet introduces *The Jumper Rig*, a trailer-mounted pressurized potable water and domestic wastewater solution for short-term usage. The Jumper Rig is designed for 1-to-3 day location transitions – the interim time when advance personnel has moved to a new location prior to the drilling rig crew. The Jumper Rig fills in at the new site until The Water and Reclaimer Rigs in The WaterFleet System move over with the drill rig crew. The Jumper Rig system consists of water storage, water pressurization, water transfer, refill capability, domestic wastewater collection, transfer and storage.

System Features

Solves Problems

- No “down time” in your potable water or domestic wastewater needs
- Minimizes or eliminates need to truck in potable drinking water or haul out domestic wastewater at new sites
- Provides immediate pressurized water to camp housing
- Collects domestic wastewater without the hassle of setting tanks

Integration

- Potable Water Tank can be filled from The Water Rig, prior to implementation
- Domestic waste collection tank can be emptied into The Reclaimer Rig once in operation on the new site
- Can eliminate need to bring in outside sources for services

Self Contained System

- 20 ft. Open Bed Tow-Trailer
- All processing and controls built into trailer
- Single electrical connection for each tank

Domestic Wastewater Storage

- 1,000 gallon domestic wastewater storage tank
- Odor control venting

Domestic Wastewater Transfer

- Incoming wastewater is managed via lift stations and piping that’s included
- Connection points secured
- 24/7 operation
- Uses an on-board pump to transfer waste to The Reclaimer Rig

Water Pressurization

- Automatic pressurized delivery to multiple points
- Delivery piping and connections included
- Connection points secured
- 24/7 Operation
- Easily Transitions to The Water Rig

Utility Requirements

Electric Power

- 120V, 1PH, 60HZ, 15Amp x 2
- Single point plug connection

About WaterFleet

WaterFleet, LLC is a dedicated service company, primarily for the oil field sector, that provides on-site potable water production and waste water treatment to temporary housing at drill sites and related camps. Our mission is to provide our customers with the highest quality mobile water solutions at an affordable price through equipment rental and support services. Our team is dedicated to Truth, Mission, Character, Service, and getting the job done right to earn leadership in our field. We are proud to be the exclusive North American Distributor of Steelhead Mobile Water Solutions.
