

The **RAFT**

Mobile Climate-Controlled Solution for Workforce Relief

WaterFleet proudly announces The RAFT, a mobile environment that expands the WaterFleet advantage of clean, compliant water processing and wastewater management. An addition to The Water Rig and The Reclaimer Rig, The RAFT is a multi-functional space that provides respite from the harsh conditions on remote work sites. Unique features include a climate-controlled break or meeting space with water, ice and food vending, audio and visual technology, and restrooms with flushing toilets, sinks and hand dryers.

The **RAFT**

The same innovators who revolutionized bottled water processing are transforming the potable water and wastewater management industry through pioneering technology. WaterFleet's green solutions significantly improve workforce living conditions and productivity, provide long-range cost savings, streamline operations, and safeguard the environment. Its problem-solving focus of on-site potable water production and wastewater management has significant applications for a variety of industries, including oil field, construction and emergency management.

System Features and Benefits

Solutions

- Seamlessly connects to WaterFleet rig system
- Fully maintained, cleaned and stocked by WaterFleet
- Offers climate-controlled break and meeting space
- Provides high-quality, fully-equipped restrooms for men and women
- Eliminates costly rental of safety showers, cooling trailers and unsanitary portable toilets
- Space for day-workers to gather for breaks or meetings
- Designed to accommodate high number of day workers

Self-Contained

- Custom, 58 ft. enclosed skid
- Single point electrical connection
- Fully automated with remote monitoring

Facilities

- Restrooms equipped with hand wash sinks and dryers
- Men's restroom with 4 commercial pressure flushing toilets and 4 urinal stations
- Women's restroom with 2 commercial pressure flushing toilets
- External safety shower, eye wash station, hand sinks, and boot wash

Advantages

- Climate-controlled restrooms accommodate 100+ workers per day
- Break room seats up to 30 at one time
- Water, ice and food vending
- Refrigerated storage
- Power ventilation
- Daily cleaning by WaterFleet
- Flat screen TV ideal for safety training or broadcasting
- Sound system connected to site radio
- Optional Class 1 First Aid station with AED defibrillator

Utility Requirements

Electric Power and Water Supply

- 220V, 1PH 150A connection (33 KVA)
- Water supplied by The Water Rig or other potable water supply
- Waste processed by The Reclaimer Rig or directed to existing sewer system
